

House in Ermenonville

Designed by architect Olivier Chopin, this single-family house was built in Timber Frame with French chestnut wood outside cladding. The house consists of a concrete basement and three volumes in light-frame construction: living room/day space, parental bedroom and children's bedrooms. All in a gross area of 414m². The work was carried out by RUSTICASA®, in accordance with the specifications that recommended the use of sustainable materials that respect the environment.
